

Sun Makes it Quick and Simple to Securely Grow Your Business Using the Power of the Web.

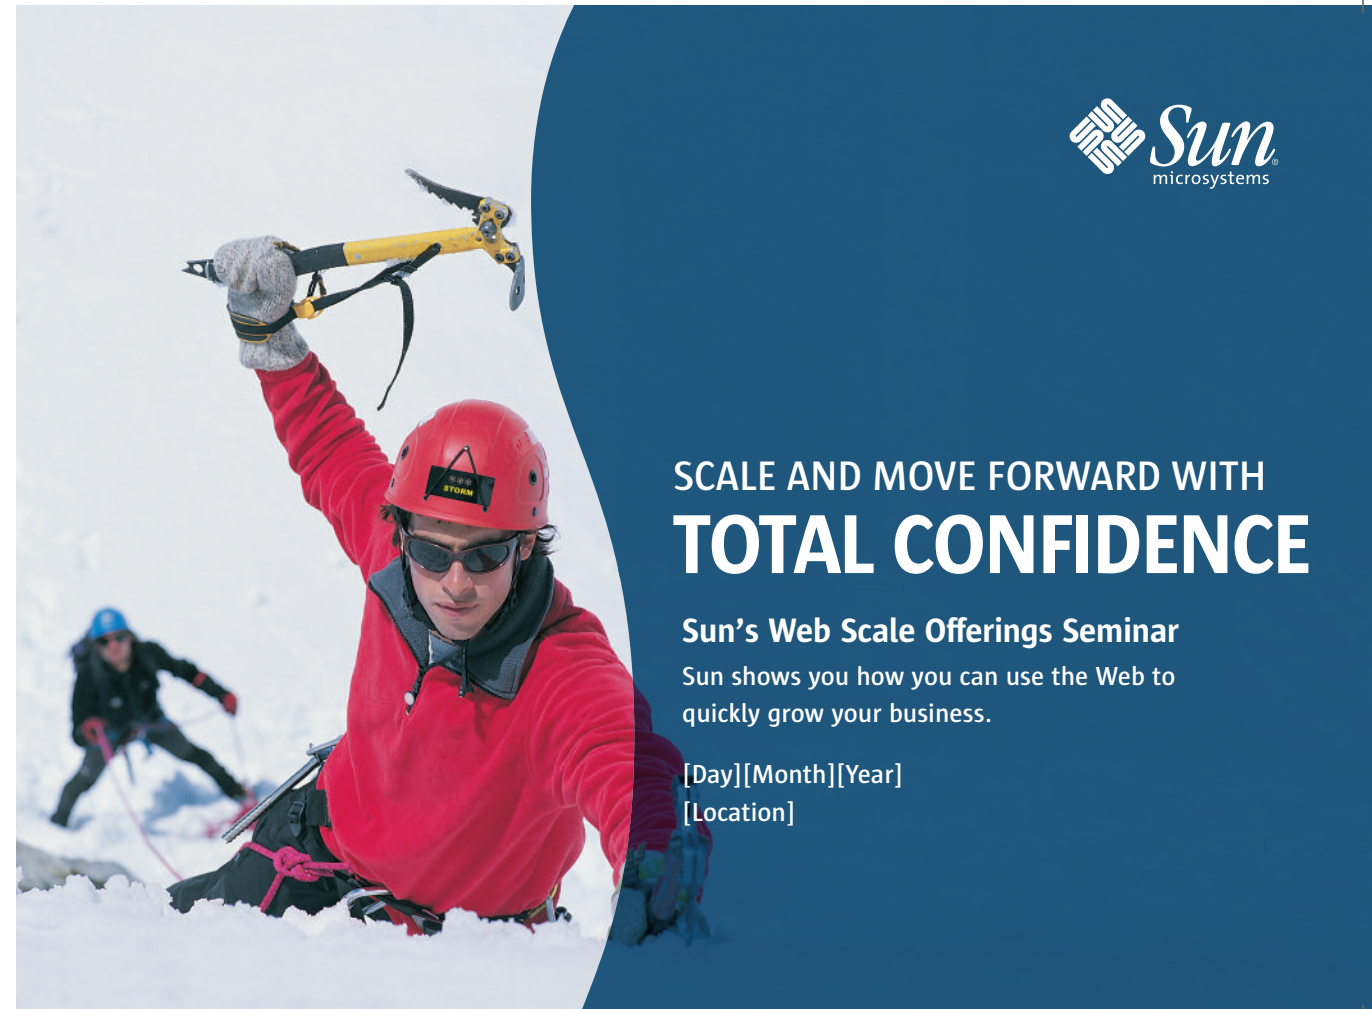

In today's business world, it is imperative for companies such as yours to participate in network applications and services. You need options that give the tools, services and software that let you build and deploy these services. The Internet is the business tool that is allowing this to happen.

And Sun is your trusted partner that'll help you make the most of the Internet to grow your business.

SCALE AND MOVE FORWARD WITH TOTAL CONFIDENCE

Sun's Web Scale Offerings Seminar

Sun shows you how you can use the Web to quickly grow your business.

[Day][Month][Year]
[Location]

Come to Our Event to Learn How to Tap This Potential.

Your business should be using the Internet to its benefit. Using rich Internet applications to drive participation and involvement between key players. As well as helping share user-generated content that benefits, and educates, all participants.

Attend Sun's Web Scale Offerings Seminar to learn more

We'll show you how to establish a competitive presence while constructing an infrastructure that grows as you go.

[Day][Month][Year]
[Location]

BUILD: See How You Can Lay the Groundwork for Monumental Success.

Take advantage of the opportunity that the next generation of the Web will offer. Use it to create and bring new services to market faster, quickly support emerging services, and offer richer user experiences.

OPTIMIZE: See How You Can Count on a Rock Solid Platform that Will Grow as You Go.

Sun products are built on open standards. Which means they can be combined with your existing IT infrastructure to easily, and cost-effectively build the reliable, scalable solutions your business needs today.

PROTECT: See How You Can Rest Easy with World-Class Security.

Sun provides the security features you need to provide a protected business environment. Safely opening your enterprise, while reducing security threats, maintaining data privacy, and minimizing business compliance risk.
